'Mens Sana In Corpora Sano'  
A healthy mind in a healthy body

# Welcome

Private GP service is friendly, convenient and more accessible than the service of most NHS GP's. Most people do not even know Private General Practice exists or why or when to access it.

You can use a private GP (private doctor) for a one-off consultation, may be a health screen or a MOT check-up and for acute illnesses, such as the flu or tummy upset. You may be looking for a more long term relationship and wish to have a private doctor to monitor you through your pregnancy or illness. We provide men, women and children with as much time with a doctor as they need in private appointments suitable to them.

Our aim is to help our patients and people stay fit and healthy in both mind and body, supporting them in diagnosing illness and aiding recovery. We are able to cover your individual needs, your entire family and even your business.

Confidential advice and treatment options can be provided for many medical conditions.
